

Poster Presentation List

No.	Title / Authors / Affiliation
P01	Crystalline Orientation Relations of α - to ω -phase in Pressure-induced Transformation of Zr by High-pressure Torsion Straining *Nozomu Adachi, Yoshikazu Todaka, Minoru Umemoto, Hiroshi Suzuki Toyoashi University of Technology
P02	Ultrafine grained TWIP steel fabricated without severe plastic deformation *Rajib Saha, Rintaro Ueji, Nobuhiro Tsuji Kyoto University
P03	Yielding Behaviors and Hall-Petch Relationship in Pure Iron *S. Gao, A. Shibata, N.Tsuji Kyoto University
P04	Effect of Prior Austenite Grain Size on Hydrogen Embrittlement in 8Ni-0.1C Martensitic Steel *Takahiro Matsuoka, Akinobu Shibata, Nobuhiro Tsuji Kyoto University
P05	Influence of Zener-Holloman parameter on formulation of ultrafine grained aluminum in torsion deformation *Sunisa Khamsuk, Nokeun Park, Daisuke Terada, Hiroki Adachi, Nobuhiro Tsuji Kyoto University
P06	Mechanical Properties of Ultrafine-Grained Metastable Austenitic Steel Fabricated by Severe Plastic Deformation *Akinobu Shibata, Hamidreza Jafarian, Nobuhiro Tsuji Kyoto University
P07	Relationship between Ferrite Grain Size and Deformation Conditions for Dynamic Transformation *Nokeun Park, Sunisa Khamsuk, Akinobu Shibata, Nobuhiro Tsuji Kyoto University
P08	Effect of grain size and grain boundary precipitates on ductility of Hadfield steel at high speed deformation *Rintaro Ueji, Tatsuya Yoshisako, Yoshikazu Todaka Kagawa University
P09	Mechanical Properties of Ultrafine Grained Pure Ti Fabricated by ARB Process and Subsequent Annealing *Daisuke Terada, Kosuke Shibata, Nobuhiro Tsuji Kyoto University

-
- P10 First-Principles Local Energy and Local Stress Calculations: Applications to Metallic Grain Boundaries and Defects
*Masanori Kohyama, Shingo Tanaka, Shigeki Saitou, Yoshinori Shiihara, Shoji Ishibashi
National Institute of Advanced Industrial Science and Technology
-
- P11 Entropic Effect on Creep in Nanocrystalline Metals
*Yun-Jiang Wang, Guo-Jie J. Gao, Akio Ishii, Shigenobu Ogata
Osaka University
-
- P12 Mechanical strength dependence on grain shape of nanocrystalline metals
*Guo-Jie J. Gao, Yun-Jiang Wang, Shigenobu Ogata
Osaka University
-
- P13 Tribological Properties of Sub-microcrystalline Ultra-Low Carbon Steel Produced by High-Pressure Torsion Straining
*Hiroataka Kato, Yoshikazu Todaka
Fukui National College of Technology
-
- P14 Precise measurement of electrical resistivity in cold rolled Ti
*Kei Ota, Masato Ueda, Masahiko Ikeda
Kansai University
-
- P15 Precise Measurement of Electrical Resistivity in ARB Processed Pure Ti
*Masato Ueda, Kei Ota, Masahiko Ikeda, Daisuke Terada, Nobuhiro Tsuji
Kansai University
-
- P16 Superconducting Properties in Niobium Processed by High-Pressure Torsion
*Terukazu Nishizaki, Seungwon Lee, Zenji Horita, Takahiko Sasaki, Norio Kobayashi
Tohoku University
-
- P17 Grain refinement and grain boundary control with low strain deformation and martensitic transformation in Ti-Ni shape memory alloy
*Mitsuteru Yasunaga, Masatoshi Mituhara, Minoru Nishida
Kyushu University
-
- P18 Improvement in the Mechanical Properties of a Duplex Stainless Steel by Applying a New Concept in Microstructure Design
*Octav Ciuca, Shan Deng, Kei Ameyama
Ritsumeikan University
-
- P19 Fabrication of ultrafine grained Al-Fe alloys with high strength and good ductility by HPT and aging
*Jorge M. Cubero-Sesin, Zenji Horita
Kyushu University
-

-
- P20 Different stages in the continuous microstructure evolution of copper deformed to ultrahigh plastic strains
*Q. S. Mei, K. Tsuchiya
National Institute for Materials Science
-
- P21 Plastic Deformation of High Strength Nanocrystalline Ni-W Electrodeposited Alloys
*Tohru Yamasaki, Keiko Ueno, Kazutaka Fujita, Hiroki Adachi, Eri Miura-Fujiwara
University of Hyogo
-
- P22 Synthesis of High Strength Bulk Nanocrystalline Ni-W Alloys By Electrodeposition

Sae Takashima, *Shota Nakayama, Masahiro Yamada, Hiroki Adachi, Eri Miura-Fujiwara, Tohru Yamasaki
University of Hyogo
-
- P23 Nanocrystallization of Zr-Cu-Ni-Al-Au Bulk Glassy Alloys During Plastic Deformation

*Masahiro Yamada, Hiroyuki Ogino, Yoshihiko Yokoyama, Tohru Yamasaki
University of Hyogo
-
- P24 Production of Nanograined Al₃Ni from Elemental Micro-Powders Using High-Pressure Torsion

*Ali Alhamidi, Hideaki Iwaoka, Kaveh Edalati, Zenji Horita
Kyushu University
-
- P25 Effect of Hydrogen on Ultrafined-Grained Pure Palladium

*Hideaki Iwaoka, Zenji Horita
Kyushu University
-
- P26 Aging behavior of AA 2099 alloy processed by high-pressure torsion

*Seungwon Lee, Zenji Horita, Shoichi Hirosawa, Kenji Matsuda
Kyushu University
-
- P27 Production of W-Base Nanocomposites Using High-Pressure Torsion

*Kaveh Edalati, Shoichi Toh, Hideaki Iwaoka, Zenji Horita
Kyushu University
-
- P28 Annealing of Al-Al₂O₃ nanocomposites after Processing by High-Pressure Torsion

*Maki Ashida, Zenji Horita
Kyushu University
-
- P29 Bulk Nanostructured Silicon Produced by High-Pressure Torsion

*Yoshifumi Ikoma, Kazuhiro Hayano, Kaveh Edalati, Zenji Horita, Katsuhiko Saito, Qixin Guo
Kyushu University
-

P30	Magnetic Properties of Nanostructured Intermetallic Compounds Fabricated by High-Pressure Torsion *Akihide Hosokawa, Hideyuki Ohtsuka, Seiichiro Ii, Tiantian Li, Koichi Tsuchiya National Institute for Materials Science
P31	Fabrication of Amorphous-Nanocrystalline $Zr_{50}Cu_{50-x}Al_x$ by High Pressure Torsion *Fanqiang Meng, Koichi Tsuchiya, Seiichiro, Ii, Yoshihiko Yokoyama University of Tsukuba
P32	Effect of HPT Deformation and Post-deformation Aging on Mechanical Properties in Ti15Mo Alloy *Baozhen Jiang, Xiaohua Min, Satoshi Emura, Koichi Tsuchiya National Institute for Materials Science
P33	Anomalous Softening of Metallic Glass by High-Pressure Torsion Straining Fanqiang Meng, *Koichi Tsuchiya, Seiichiro Ii, Yoshihiko Yokoyama National Institute for Materials Science
P34	Effect of HPT deformation and post-deformation aging on microstructures and magnetic properties in Fe ₂ VAl alloy *Tiantian Li, Qingsong Mei, Akihide Hosokawa, Koichi Tsuchiya National Institute for Materials Science
P35	Simulation of Texture Evolution during Equal Channel Angular Extrusion via Route C *Akira Yanagida, Takayuki Tama Tokyo Denki University
P36	Numerical Simulation of Temperature Effect on Shear Deformation Zone *Ismail Tirtom, Shuji Kawando, Jun Yanagimoto The University of Tokyo
P37	Effect of Carbon Content on Estimated True Stress-True Strain Relationships up until the Plastic Deformation Limit in Ultrafine-Grained Ferrite-Cementite Steels *Noriyuki Tsuchida, Tadanobu Inoue University of Hyogo
P38	Misorientation change of grain boundaries in pure copper bicrystals subjected to one-pass equal-channel angular pressing *Kentoku Hirayama, Hiroyuki Miyamoto, Hiroshi Fujiwara Doshisha University
P39	Nanocrystalline nickel dispersed with nano-size WO ₃ particles synthesized by electrodeposition *Shota Takehara, Hiroyuki Miyamoto, Hiroshi Fujiwara Doshisha University

P40	<p>The age-hardening mechanism of nanocrystalline Ni-P alloys synthesized by electrodeposition</p> <p>*Natsu Kobayashi, Yosuke Kasazaki, Hiroyuki Miyamoto, Hiroshi Fujiwara</p> <p>Doshisha University</p>
-----	---

P41	<p>Effect of Equal-Channel Angular Pressing Prior to Cold Rolling on Textures and Microstructures of 16% Cr Ferritic Stainless Steel Sheets</p> <p>*Ryuji Shinogi, Hiroyuki Miyamoto, Hiroshi Fujiwara, Masaharu Hatano</p> <p>Doshisha University</p>
-----	--

P42	<p>Nano-Grain Formation of Austenitic Stainless Steels by Annealing after Shot-Peening</p> <p>*Masafumi Imoto, Hiroyuki Miyamoto, Hiroshi Fujiwara</p> <p>Doshisha University</p>
-----	---

P43	<p>Mechanical Properties of Harmonic Structured Composite Material with pure Titanium and Ti-48at%Al Alloy produced by MM / SPS Process</p> <p>*Takeshi Kawabata, Hiroshi Fujiwara, Hiroyuki Miyamoto, Kei Ameyama</p> <p>Doshisha University</p>
-----	---

P44	<p>Mechanical Properties of Tool Steel / Mild Steel Composite Materials with Harmonic Structure</p> <p>*Yusuke Yamada, Hiroshi Fujiwara, Hiroyuki Miyamoto, Kei Ameyama</p> <p>Doshisha University</p>
-----	--

P45	<p>Capability of "Tube Channel Pressing" as a novel Severe Plastic Deformation process</p> <p>*Mohammad Hassan Farshidi, Mohsen Kazeminezhad, Hiroyuki Miyamoto, Amir Ali Zangiabadi</p> <p>Sharif University of Technology</p>
-----	---

P46	<p>Effect of solute Fe on dislocation substructure in cold-rolled Al alloys</p> <p>*Seiichiro Ii, Masatoshi Mitsuhashi, Satoshi Hata, Satoshi Emura, Koichi Tsuchiya</p> <p>National Institute for Materials Science</p>
-----	--

P47	<p>Numerical Study of Effect of Back Pressure on Equal Channel Angular Extrusion (ECAE)</p> <p>*Vinicius Aguiar de Souza, Ikumu Watanabe</p> <p>National Institute of Materials Science</p>
-----	---

P48	<p>Stability of Fatigued Dislocation Structure in UFG Aluminum against Monotonic Tensile Deformation</p> <p>*Yukito Nakanishi, Yoji Miyajima, Toshiyuki Fujii, Susumu Onaka, Masaharu Kato</p> <p>Tokyo Institute of Technology</p>
-----	---

P49 Effect of additional shear stress on texture evolution during ARB process

*Yoji Miyajima, Midori Uchiyama, Hiroki Adachi, Toshiyuki Fujii, Susumu Onaka,
Masaharu Kato

Tokyo Institute of Technology

P50 Relationship between mechanical properties and microstructure in ultrafine-grained
Cu-Si alloy processed by accumulative roll bonding

Yoji Miyajima, Hiroki Abe, Toshiyuki Fujii, Susumu Onaka, *Masaharu Kato

Tokyo Institute of Technology

P51 Low temperature creep behavior of ultrafine-grained Cu

*Satoshi Okubo, Yoji Miyajima, Toshiyuki Fujii, Susumu Onaka, Masaharu Kato

Tokyo Institute of Technology

P52 Effect of Initial Structure on Formation of Ultrafine Grains during Warm Deformation
of Ferrite

*Naoya Kamikawa, Unhae Lee, Goro Miyamoto, Tadashi Furuhashi

Tohoku University

P53 Thermal Stability of Microstructures of SUS316L Stainless Steel with
Nanostructured Twins Induced by ECAP

*Yoshihisa Kaneko, Naoki Tabata, Hiroshi Ueno, Alexei Vinogradov

Osaka City University

P54 *In-situ* neutron diffraction study of bainite transformation after low-temperature
ausforming for nanobainite steel

*Wu Gong, Yo Tomota, Stefanus Harjo, Kazuya Aizawa, Anna Maria Paradowska

Ibaraki University

P55 Microstructure and texture changes during annealing in an Ultrafine-grained
Electrodeposited Pure Iron Sheet

*Yuhua Su, Yo Tomota, Stefanus Harjo

Ibaraki University

P56 Atomistic Simulations of Activation Ability of Dislocation Source within Grain
Boundary

*Tomohito Tsuru, Yoshiteru Aoyagi, Tomotsugu Shimokawa, Yoshiyuki Kaji

Japan Atomic Energy Agency

P57 Crystal Plasticity Simulation on Tension-Compression Asymmetry of Bulk
Nanostructured Metals

*Yoshiteru Aoyagi, Tomotsugu Shimokawa

Tohoku University

P58 Analysis of Creep Curve by Strain Acceleration Parameter in Sinter of Ultrafine
SUS304 Particles Made by Arc Plasma Method

*Hiroyuki Sato, Ken Otaka, Yuji Enomoto, Kosuke Omote

Hirosaki University
